Codere selects Evolution as exclusive Live Casino provider for Mexico

Evolution Gaming, leading provider of Live Casino solutions, has announced that it has signed an agreement with Codere, the Spanish gaming giant, for the exclusive provision of Live Casino in Mexico, one of the multinational group's key markets.

The deal marks Evolution's entry into the Mexican market, where Codere is already the largest operator of gaming halls. Since February 1, Codere – Real Madrid's Official Sports Bookmaker – has enriched its gaming offer in Mexico with online gaming through the website www.codere.mx.

The latest agreement will allow Codere to stream Evolution's full portfolio of award-winning Live Casino games to online players on desktop, tablet and smartphone. This will include standard and VIP tables for Evolution Live Roulette, Blackjack, Baccarat and Baccarat Squeeze games, numerous Poker variants (including the new Live Caribbean Stud Poker with Progressive Jackpot) and Evolution's new Dream Catcher Lucky Wheel. Amongst the Poker variants are titles exclusive to Evolution, such as Live Three Card Poker and Ultimate Texas Hold'em.

Felipe Ludena Munoz, Corporate CIO at Codere, said: "Evolution's extensive experience in Live Casino market in Europe makes us feel confident that Codere will be extremely well equipped to launch best-in-class online Live Casino in Mexico and maximise immediate and future online Live Casino opportunities in this market."

Gionata La Torre, Evolution's Regional Director, added: "We are of course proud and delighted to be working with Codere, a major global brand, for our first entry into this important new market. We very much look forward to introducing the richest, most exciting line-up of world-class Live Casino games to Codere players in Mexico."
